

FEN 15200 F.1

Hybrid fennel variety with a cycle of 70-75 days from transplanting. Recommended for harvesting in late summer and autumn. Plants are medium-strong and healthy.
Bulbs are ready at commercial stage of 400-500 g weight; the shape is round and the colour a very attractive shiny white. Good bulb quality with small core.
FEN 15200 shows good field-holding ability and post-harvest storage.
