

VICERÈ F1* (TCY 2917)

PLANT

Indeterminate yellow cherry tomato for single fruit or bunch harvesting. Medium-high vigor plant, rustic with short internode, characterized by an open and covering leaf system. Excellent fruit setting and high productivity. Suitable for greenhouse or open field cultivation.

FRUIT

Perfectly round and bright yellow even when post-ripened. Bunches arranged in a herringbone pattern with 14-16 fruits held firmly by a robust, intense green rachis. Good fruit firmness and excellent cracking tolerance. High Brix (8-9°) and unmistakable taste. Weight 16-18 grams.
