

MOHAY F.1

The fruit is of good size, with shoulder up to 9 cm wide and 16-18 cm long. It has a smooth skin, thick flesh and average weight of 400-450 g. The colour turns to deep yellow at full ripening. The size and uniformity of the fruit remain constant throughout the harvesting time. The plant is vigorous, with upright habit and good leaf covering. The cycle is medium-early. Recommended for early plantings in protected cultivation with seedlings grafted onto rootstock Rocal, exploiting extended yield until autumn. High resistance (HR) to Tobamovirus (Tm:0) and intermediate resistance (IR) to Tomato spotted wilt virus (TSWV).

INFORMAZIONI AGGIUNTIVE

Botanical Name	Capsicum annuum L.
Produced by	Esasem
Variety	
Typology	3/4 Lungo
Colour	
Dimension	9 x 16-18 cm
Weight	400 – 450 gr
Feature	Firm and thick flesh
Vigor	High
Plant characteristic	Vigorous upright habit with good covering
Cycle	Medium – Early
Strength	HR:Tm:0, IR:TSWV
Use	Greenhouse
Note	The size and consistency remain constant throughout the harvesting time
