CUP 18100 F1*

Pickling cucumber for open field cultivation. Fruits are dark, bright green in colour, fully cylindrical and uniform in shape with width/ length ratio of 1/3. Plants have good vigour, an early maturity cycle and excellent fruit setting ability. Tolerant to the main common virus affecting the crop, CUP 18100 F1 is also well adapted for fresh market and processing use.

ADDITIONAL INFORMATION

Flowering	Andromonoecious
Shape	Cylindrical, straight and ribbed 30-35 cm, Dark, bright green colour, uniform shape with width/ length ratio of 1/3
Lenght	30 – 35, 5-8 cm
Cycle (days from transplantation)	Short
Plant	Plants have good vigour, an early maturity cycle and excellent fruit setting ability
Strength	Tolerant to the main common virus affecting the crop
Use	Greenhouse, Open Field
