

ROSALBA F.1

Pink hybrid tomato, very early maturing with attractive round-globe fruit. Rosalba is characterized by compact plants with very short internodes, suitable for short crop production and concentrated harvesting. **Fruit setting is very good even in low temperatures;** this characteristic allows it to be early on the market especially with early spring crops in continental areas. Fruits are very uniform with an average size of **240-260 g**, multilocular with small seed cavities. Taste and firmness are also much appreciated.

Resistances:
HR: Vd:0 / Va:0 / ToMV:0-2 / Fol:0,1 / Pf:A-E
