

PARIPA F.1

Pepper hybrid "red topepo" type. The plant is vigorous, with good leaf covering and high yield. The fruit is round flattened with diameter of 9 cm, slightly ribbed, weighing 150 g. The flesh is sweet and particularly thick and ensures a good shelf life in post-harvest. Paripa is characterized also by the high sugar content of the fruit, suitable for fresh market and processing. High resistance (HR) toTMV race 1-2 (Tobacco Mosaic Virus).
