

GOLDRAKE F.1

Interspecific rootstock for tomato with strong root system, well-balanced and highly generative. Recommended for grafting cherry and cherry plum varieties for long cycle as it does not change the taste and ensures continues production. Sowing of rootstock should be done 7 days before scion.

Resistances:
HR: Vd:0 / Va:0 / Fol:0,1 / ToMV:0-2
IR: PI / ForI / MaMiMj
