

PODIUM F.1

Podium has a determinate, vigouros and healthy plant, with medium-late cycle and good leaf covering. It is very productive, develops jointless oval shaped fruits, weighing about 80 g. For this character combined with its colour and good flesh firmness, Podium is recommended for the production of diced tomato, as well as paste and puree. Podium shows wide adaptability to the most different environmental conditions, even if it prefers clay soils.

INFORMAZIONI AGGIUNTIVE

Botanical Name	Lycopersicon esculentum L.
Produced by	Esasem
Variety	
Destination	processing
Typology	Blocky determinate
Shape	oval with high brix
Pulp	good thickness
Consistency	high
Weight	80 gr
Vigor	High
Leaf Cover	Elevata
fruit set	Good
Cycle	medium-late
Strength	HR: Fol 0,1, HR: Va:0, HR: Vd:0, IR: MaMiMj
Use	paste and diced tomatoes
Note	Due to high fruit setting and good size it is recognized for its remarkable yield.
